## ABOUT ALEX

Alex Tervinsky is an Estonian-born cinematographer whose professional experience spans feature films, short films, commercials, and documentary projects. He has worked across a range of film and advertising productions in various camera department roles, giving him a strong technical foundation, solid on-set awareness, and the ability to approach visual storytelling as a complete creative whole.

Alex earned his cinematography degree in the United Kingdom in 2021. Before returning to Estonia in 2023, he worked between Estonia and Spain, mainly in Madrid and Málaga, which gave him international experience and a broader perspective on audiovisual creative work.

Today, he works as a freelance cinematographer and Steadicam operator, and is a co-founder of the production company HowBizzar. His work combines technical precision, dynamic camera movement, and a strong sense of visual storytelling.
